

## SKILLCRAFT TECHNOLOGY | HR DEPARTMENT

### JOB ANALYSIS & POSITION DESCRIPTION

POSITION TITLE : Mid-Level Data Analyst

DEPARTMENT : Data Science & Analytics

REPORTS TO : Analytics Manager

JOB TYPE : Full-Time / Remote

SALARY RANGE : ₹8,00,000 – ₹12,00,000 LPA (with experience)

#### ABOUT SKILLCRAFT TECHNOLOGY

SkillCraft Technology is a forward-thinking organization dedicated to innovation and excellence in the tech sector. We empower our teams to solve complex problems through data-driven strategies and collaborative growth.

#### 1. POSITION PURPOSE

The Mid-Level Data Analyst will bridge the gap between raw data and strategic business execution. This role is responsible for designing automated dashboards, analyzing complex datasets, and delivering actionable insights that directly influence product development and operational efficiency.

#### 2. KEY RESPONSIBILITIES & DUTIES

I. Data Governance & Pipeline Management: Clean, transform, model structural and unstructured data from warehousing systems using SQL.

II. Advanced Analytics & Reporting: Build, maintain, and optimize interactive bi-reporting dashboards using Tableau and Power BI to monitor business KPIs.

III. Statistical Modelling: Apply statistical methods (A/B testing, regression analysis) to validate business hypotheses and track product feature performance.

IV. Stakeholder Collaboration: Translate complex quantitative data into clear strategic recommendations for non-technical department heads (Product, Marketing).

### 3. SKILL SPECIFICATIONS

#### TECHNICAL SKILLS:

- I. Database Querying: Advanced SQL proficiency (Joins, Window Functions, CTEs).
- II. BI Tools: Expert-level dashboard development in Power BI or Tableau.
- III. Programming Languages: Strong foundation in Python or R for data manipulation (Pandas, NumPy).
- IV. Data Warehousing: Familiarity with cloud data platforms like Snowflake, BigQuery, or AWS.

#### SOFT SKILLS:

- I. Analytical Thinking: Strong problem-solving skills with an emphasis on data accuracy.
- II. Communication: Ability to articulate data insights clearly to cross-functional teams.
- III. Time Management: Proven ability to manage multiple analytical projects under tight deadlines.

### 4. EDUCATION & EXPERIENCE REQUIREMENTS

- 1) Bachelor's degree in Data Science, Computer Science, Statistics, Economics, Business Analytics, or a related quantitative field.
- 2) 2 to 4 years of professional experience working as a data analyst or business intelligence engineer.

### 5. COMPENSATION, PERKS & BENEFITS

To attract top talent, SkillCraft Technology offers a comprehensive competitive package.

- I. Competitive Pay: Annual performance-linked bonus matching industry standards.
- II. Remote Setup Allowance: One-time stipend for home office setup (Ergonomic chair, monitor).
- III. Health & Wellness: Comprehensive medical insurance covering family, plus mental health subscriptions.
- IV. Continuous Learning: Annual learning stipend for professional certifications (AWS, Coursera, etc.).
